EXPERIMENT-7

AIM: Create pipeline using Blue Ocean plugin

The screenshot shows a Mozilla Firefox browser window with the address bar displaying `https://github.com/nipunsingal7/blueOcean/tree/master`. The browser's tab bar shows several open tabs, including "what is salting in", "Computer Gr", "Blackboard Le", "Continuous", "Jenkins", and "nipunsinga". The GitHub repository page for "nipunsingal7 / blueOcean" is displayed. The repository has 1 branch (master) and 0 tags. The commit history shows a single commit by "nipunsingal7" with the message "first commit" and a commit hash of "2cdfe6f". The file "Jenkinsfile" is listed as part of the first commit. The right sidebar contains the "About" section with the text "No description, website, or topics provided.", the "Releases" section with "No releases published" and a link to "Create a new release", and the "Packages" section with "No packages published" and a link to "Publish your first package".

Personal access tokens

New personal access token

Personal access tokens function like ordinary OAuth access tokens. They can be used instead of a password for Git over HTTPS, or can be used to [authenticate to the API over Basic Authentication](#).

Note

blueocean

What's this token for?

Select scopes

Scopes define the access for personal tokens. [Read more about OAuth scopes](#).

<input checked="" type="checkbox"/> repo	Full control of private repositories
<input checked="" type="checkbox"/> repo:status	Access commit status
<input checked="" type="checkbox"/> repo_deployment	Access deployment status
<input checked="" type="checkbox"/> public_repo	Access public repositories
<input checked="" type="checkbox"/> repo:invite	Access repository invitations
<input checked="" type="checkbox"/> security_events	Read and write security events
<input type="checkbox"/> write:packages	Upload packages to github package registry

Performing a TLS handshake to github.com...
